

PRET A PORTER

PORCELAIN FLOOR TILES

- UNIQUE 100% DRY FIXING SYSTEM
- NO ADHESIVE, NO GROUT, NO MESS
- QUICK AND EASY TO INSTALL
- ENVIRONMENTALLY FRIENDLY

IDEAL FOR: SHOPFITTING - EXHIBITION STANDS - DOMESTIC

TEMPORARY STRUCTURES - FAST TRACK CONTRACTS

- 1 Take the polymer angle from the packaging.
- 2 Turn the tile upside down to expose the polymer grid on the underside.
- 3 Match up the lines on the back of the tile with the lines on the polymer angle and clip the angle into place by exerting light pressure.
- 4 & 5 Set out the floor normally and engage each tile by pressing together on the polymer angle.
- 6 The tiles are cut using traditional methods and are finished by cutting through the polymer grid with a knife.
- 7 & 8 Fix the cut tile into position as before or knock in with a rubber head hammer.
- 9 & 10 Edges can be finished with purpose made skirting pieces that are fitted with silicone.
- 11 Tiles can easily be removed using a suction pad.
- 12 No drying times, floors can be used immediately.

SHOPFITTING A clean application that can be handed over the minute that fitting is completed.

EXHIBITION STANDS Cost effective, the tiles can be lifted and re-laid time and time again

DOMESTIC Minimal disruption, tile over timber floors without fear of cracking due to movement.

TEMPORARY STRUCTURES Quick and clean removal for re-use, minimal waste.

FAST TRACK CONTRACTS A clean and fast application with no drying time.
